The five words are: Seiri, Seiton, Seiso, Seiketsu, and Shitsuke which can be translated to Housekeeping, Workplace Organization, Cleanup, Cleanliness, and Discipline. CRISPR has emerged as a revolutionary tool for plant genome editing. Although developed recently, it has been established in several important plant species, including rice, wheat, and maize, to introduce agronomically important traits such as heat/cold tolerance, disease resistance, herbicide tolerance, and yield improvement. The Missouri River is known for its channelized riverbanks and fast currents, and therefore can be a little intimidating for some anglers. But if catfish is your species of choice, the Missouri River offers some of the best fishing in the state. Catfish Fishing for channel and flathead catfish has historically been best along the main channel and in backwater areas.
