In this lesson, you will take a ride on the transportation system of the body called the circulatory system and its two parts: the pulmonary circuit and the systemic circuit. Though oxygen efficiency is decreased by the mixing that takes place in the single ventricle, this type of circulation allows blood to move quickly throughout the circulatory system. Circulatory system lesson plans and worksheets from thousands of teacher-reviewed resources to help you inspire students learning. The heart, blood, and blood vessels are the major components of the cardiovascular system. Like the bustling factory, the body must have a transportation system to carry its various cargos back and forth, and this is where the cardiovascular system steps in.
