

Download Educating The 21st Century Nurse Challenges And Opportunities

Educating the 21st Century Nurse: Challenges and Opportunities: 9780887377464: Medicine & Health Science Books @ Amazon.com The current challenges to nursing students include the continued matriculation from traditional classroom-based educational programs to web-based programs, the academic preparation of adequate numbers of registered nurses to meet the growing healthcare demands, the rapid pace of healthcare changes which demand almost constant re-assessment of nursing curriculums, and the recruitment and retention of qualified nursing faculty to teach students. Purpose: The purpose is to address topics related to nursing: social and healthcare change; the value of education; cultural diversity family systems; and chronicity related to the 21st century. It will be of interest to faculty who enjoy or teach nursing issues topics; however, it will not lend itself as a textbook for either undergraduate or graduate courses, except with a companion text or readings. Distance learning--education to prepare nurses for practice in the 21st century / Charlotte F. Beason -- Nursing research--'bacc' to the future / Paulette R. Cournoyer. VII. Enhancing opportunities through collaborative initiatives.
