You're currently viewing our resources for Economics. For additional assistance, you should refer to the discussion forum for this course. 2018: A practice essay on "Explain the relationship between evolution and biodiversity." Discusses the overarching ideas about the Diversity of Life, thus useful for note taking. Scientology is a body of religious beliefs and practices launched in May 1952 by American author L. Ron Hubbard (1911–86). Hubbard initially developed a program of ideas called Dianetics, which was distributed through the Dianetics Foundation. The foundation soon entered bankruptcy, and Hubbard lost the rights to his seminal publication *Dianetics: The Modern Science of Mental Health* in 1952. • To all readers: there was a very interesting and pertinent article that recently was posted at [theheart.org](http://theheart.org) / Medscape. This is a professional site and not accessible to patients so, if your physician is not sure whether or not you can have an MRI safely, have him/her read this piece.
